HEY, HOW ARE YOU?

Transnational project meeting №4 took place in The Hague, The Netherlands

The partners met on 25th and 26th January 2024 in The Hague, Netherlands. Our host VI One Consultancy organised it in a best possible way in order to combine work with leisure. During this meeting, we had an opportunity to review all project results and reach a consensus on our next steps! We moved forward to the final steps of the project!

E-training Session

On 10 September 2024 we took part in the PARTICIPATORY VIDEO E-TRAINING. The primary focus of the training was to gain knowledge on how to record a video and audio and how to edit and export it afterwards. The software used for the purposes of the training was Adobe Premiere Rush. All partners invited 2 external educators who were able to learn more on the topic trying to create and record/ edit a video.

Conducting the Piloting Phase

As the project moves into the piloting phase, our partners are focused on assessing the effectiveness and usability of the digital literacy training modules and the MOOC (Massive Open Online Course) designed for facilitators and educators working with seniors. This critical phase will help refine the training materials and lesson plans, ensuring they are practical and impactful before wider implementation.

Each project partner will engage 2-3 educators who work directly with seniors, with each session involving 15 seniors. The piloting sessions will be hands-on, providing opportunities for both educators and seniors to interact with the digital literacy content, while also offering their feedback. Feedback will be collected through surveys and interviews with both educators and seniors. A single, streamlined questionnaire will be used to gather insights from both groups, administered immediately after each session to capture fresh experiences. Personal interviews will offer deeper insights, addressing challenges and suggestions for future improvements. Stay tuned for more updates as we continue to gather valuable feedback and enhance the training materials.

Our MOOC user guide manual is now ready!

We have created a short video that explains how to register and use the platform with ease. To get started, simply visit www.mooc.igifuproject.eu. Once on the website, you will find detailed manuals and guides to help you through the process, from creating an account to enrolling in courses. Choose your preferred language (English, Polish, Hungarian, Dutch, Spanish, or Greek), and explore the various courses available.

If you have any questions while using the platform, the FAQ section and chat support are readily available to assist you.

Recording Participatory Videos

Participatory video is a collaborative approach where community members are involved in creating a video to express their views, share their experiences, and communicate their messages. This method is often used in development work, social research, and community projects to ensure that the voices of the community are heard and represented authentically.
Now, the partners are recording them, so stay tuned for the upcoming participatory videos!
